Listens to students' questions and comments						
What were the most and least helpful things the instructor did to communicate effectively? Justin was an illustrative teacher and used extensive examples and possible scenarios to provide the learner with a comprehensive, practical context when using AI scribe. He could improve by occasionally pausing and checking in with the learner's understanding and goals more often throughout the discussion rather than towards the end.						
C. Interaction with Participants	1	2	3	4	5	NA
Maintains participant attention						
Responds to nonverbal cues of confusion, boredom, and curiosity						
Encourages student questions or discussion; asks questions to monitor student progress						
Listens to students' questions and comments						
Gives satisfactory answers to student questions, restating questions and answers when needed						
How did the instructor show interest in the students and their learning? Justin was attentive and curious about the learner's thoughts before and after the session. He designed and provided a role-play simulation to help a learner with no previous AI scribe experience. Learner was comfortable and relaxed in the environment. She interjected when needed and asked thoughtful questions, which shows the rapport she has with Justin. He often validated the concerns coming from the learner and was encouraging in his answers.						
D. Instructional Materials and Environment	1	2	3	4	5	NA

Presentation follows handout						
Present appropriate amount of material at appropriate level of complexity; material up-to-date						
Presents helpful audiovisual materials to support lesson organization and major points						
Presents helpful written materials to reinforce key points						
To what extent did the instructor vary the instructional methods for the material presented? What other methods might have been appropriate? In this 1:1 teaching session, Justin provided a brief didactic overview of AI scribe, then went through a demonstration of AI scribe via a role-play simulation with printed prompts. When the learner asked a “what-if” question, he then invited the learner to role-play off-script and addressed the question directly through demo. Justin could consider switching roles and have the learner play the physician to practise verbalizing the objective findings in different patient populations, etc.						
E. Small group	1	2	3	4	5	NA
