

INTAPT Teaching Log

Session #: 6 Date of Session: 12/02/2025 # of hours: 2

Type of education activity (1:1 ambulatory, program meeting, etc.) / Name of education program: _____

teaching session - training new surgical assistants.

Location / hospital*: Milton District Hospital - Surgery + Procedures Unit

Student's Initials / # of participants*: 6 learners (RK, SR, SI, Z.B., JB, EM)

Education level of student / participants (UG, PG, etc.):* MDs.

Positive aspects of session: - participants engaged in hands-on learning +

procedural practice, including laparoscopic camera use.

- reinforced key surgical assisting principles, including aseptic technique.

Difficulties of session: - varied skill levels resulted in differing levels of confidence among participants.

Reflection and interpretation of session (analysis): - demonstrated the importance of individualizing teaching approaches for a mixed skill group.

Consideration of future strategies for managing similar sessions: - implement small group teaching to better tailor instruction.

- utilize peer-assisted learning, allowing advanced learners to support novices.
